

Network Event for Scientists

**Challenges of the Scientific & Technological
Evolution for the Export Control System**

November 2018, Yerevan, Armenia

Dr Kai ilchmann

Why try to network scientists

Recognised problem

Misuse potential

Accidents

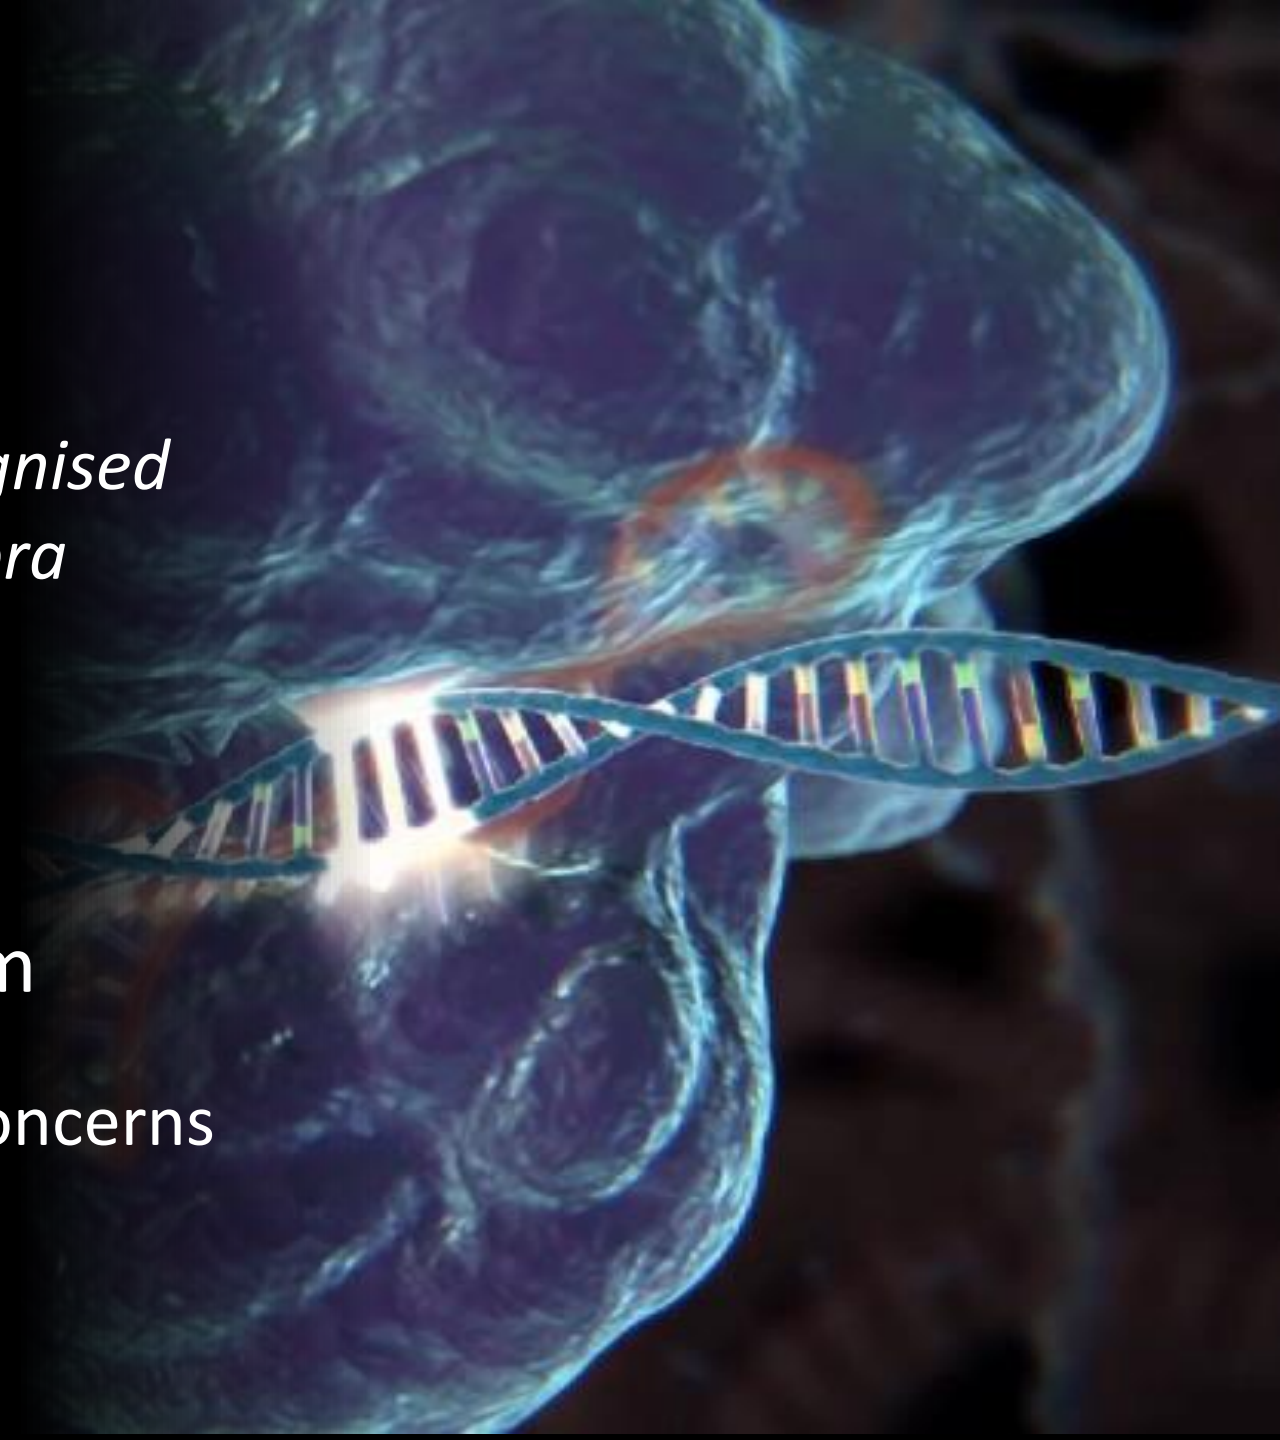

*Widely recognised
in security fora*

Awareness raising

Scientists are not the problem

...few are aware of security concerns

...few take seriously

Why try to network scientists

Policy input

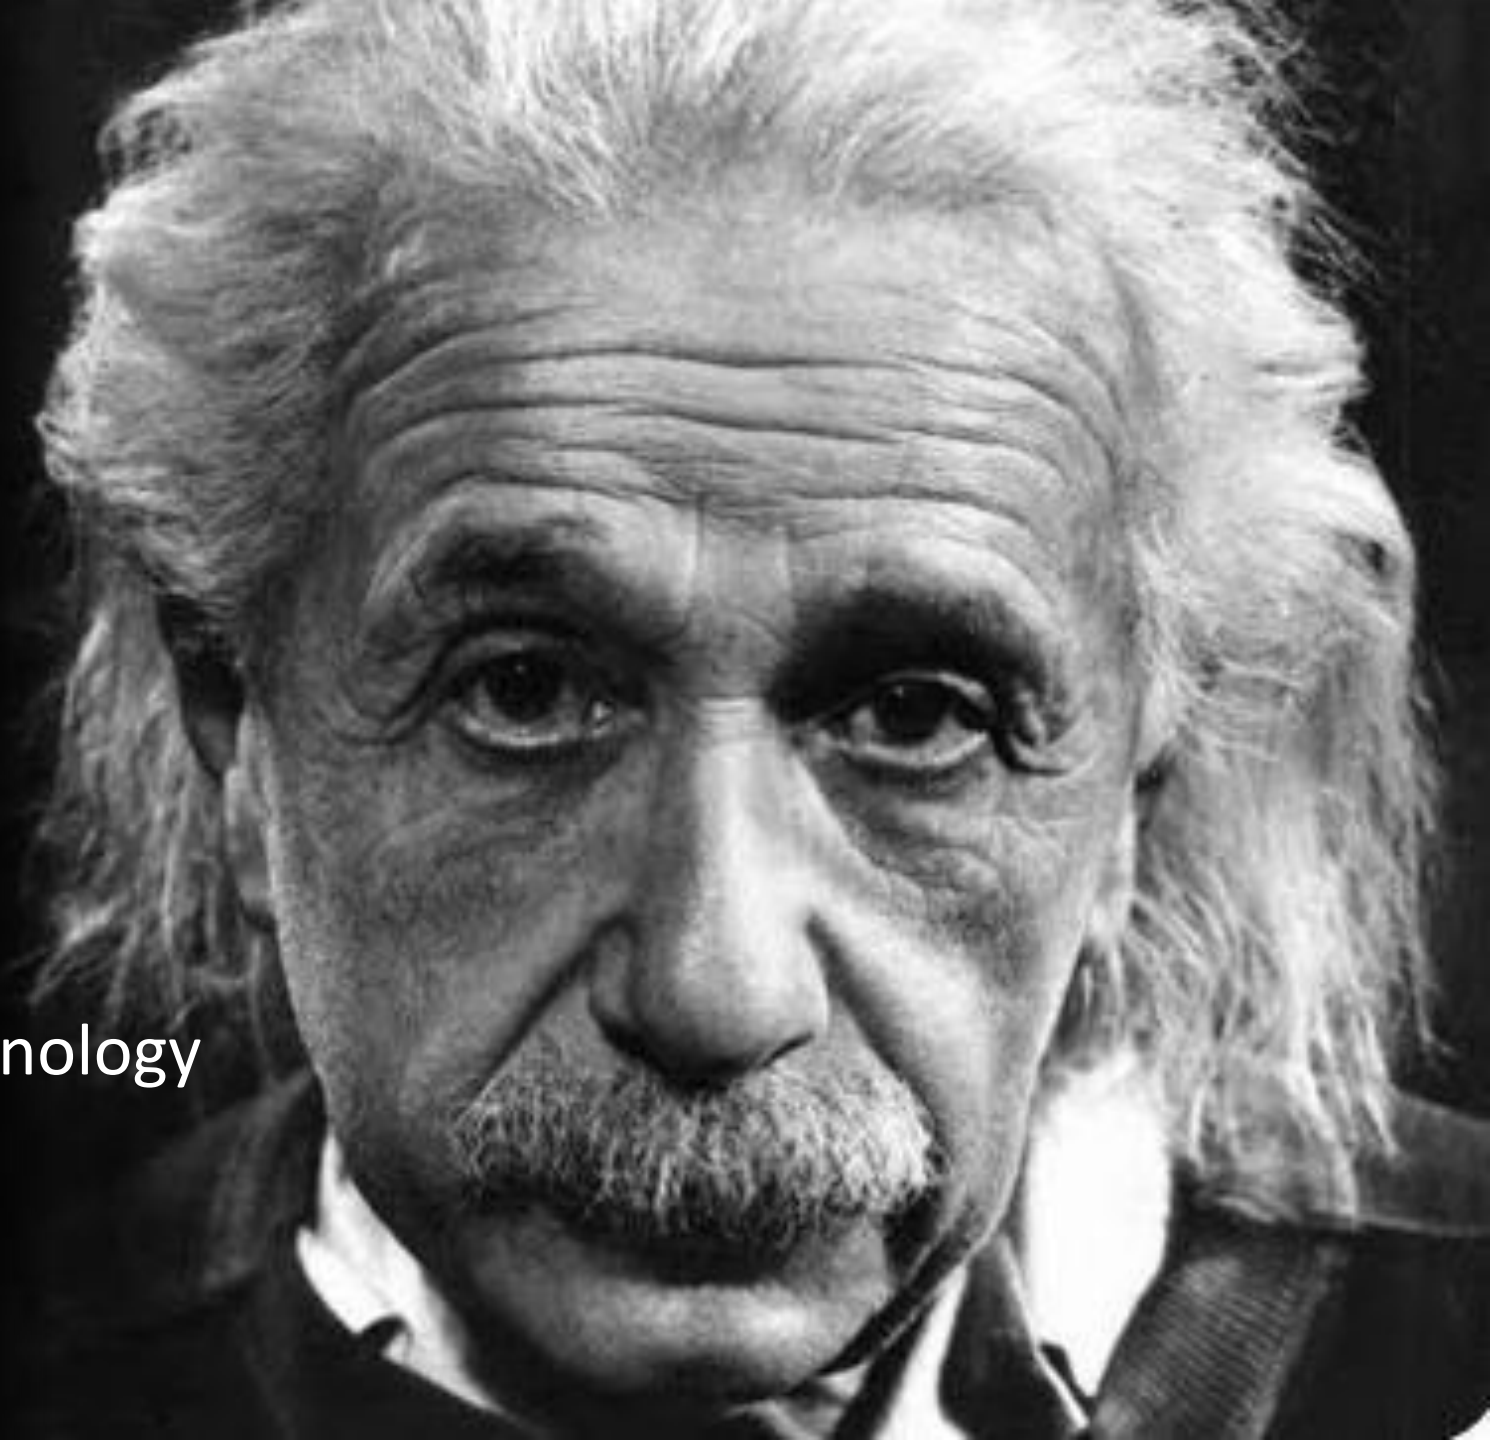

Relevant expertise...

...for relevant controls

Understand...

...changing science & technology

...specific context

Why would ~~they~~ want to?

the research community

Us vs Them?

Relevance raising

Directly affected

Self interest

Proactive Compliance

Shape policy

A person with long dark hair, wearing a blue puffer jacket and a red scarf, stands on a mossy rock in the foreground, looking out over a vast valley. The valley is filled with green grass and scattered rocks. In the background, a large, rugged mountain with many sharp, rocky peaks rises against a blue sky with white clouds. The scene is a mix of natural beauty and geological wonder.

Networking event?

Short presentations

...by scientists

...on their subject

...and its societal impact

Walk - shop

...leave familiar environment

...network

...structured discussion

Who, what and how?

Participants

scientific leaders

...working in relevant disciplines

small select group

Selection

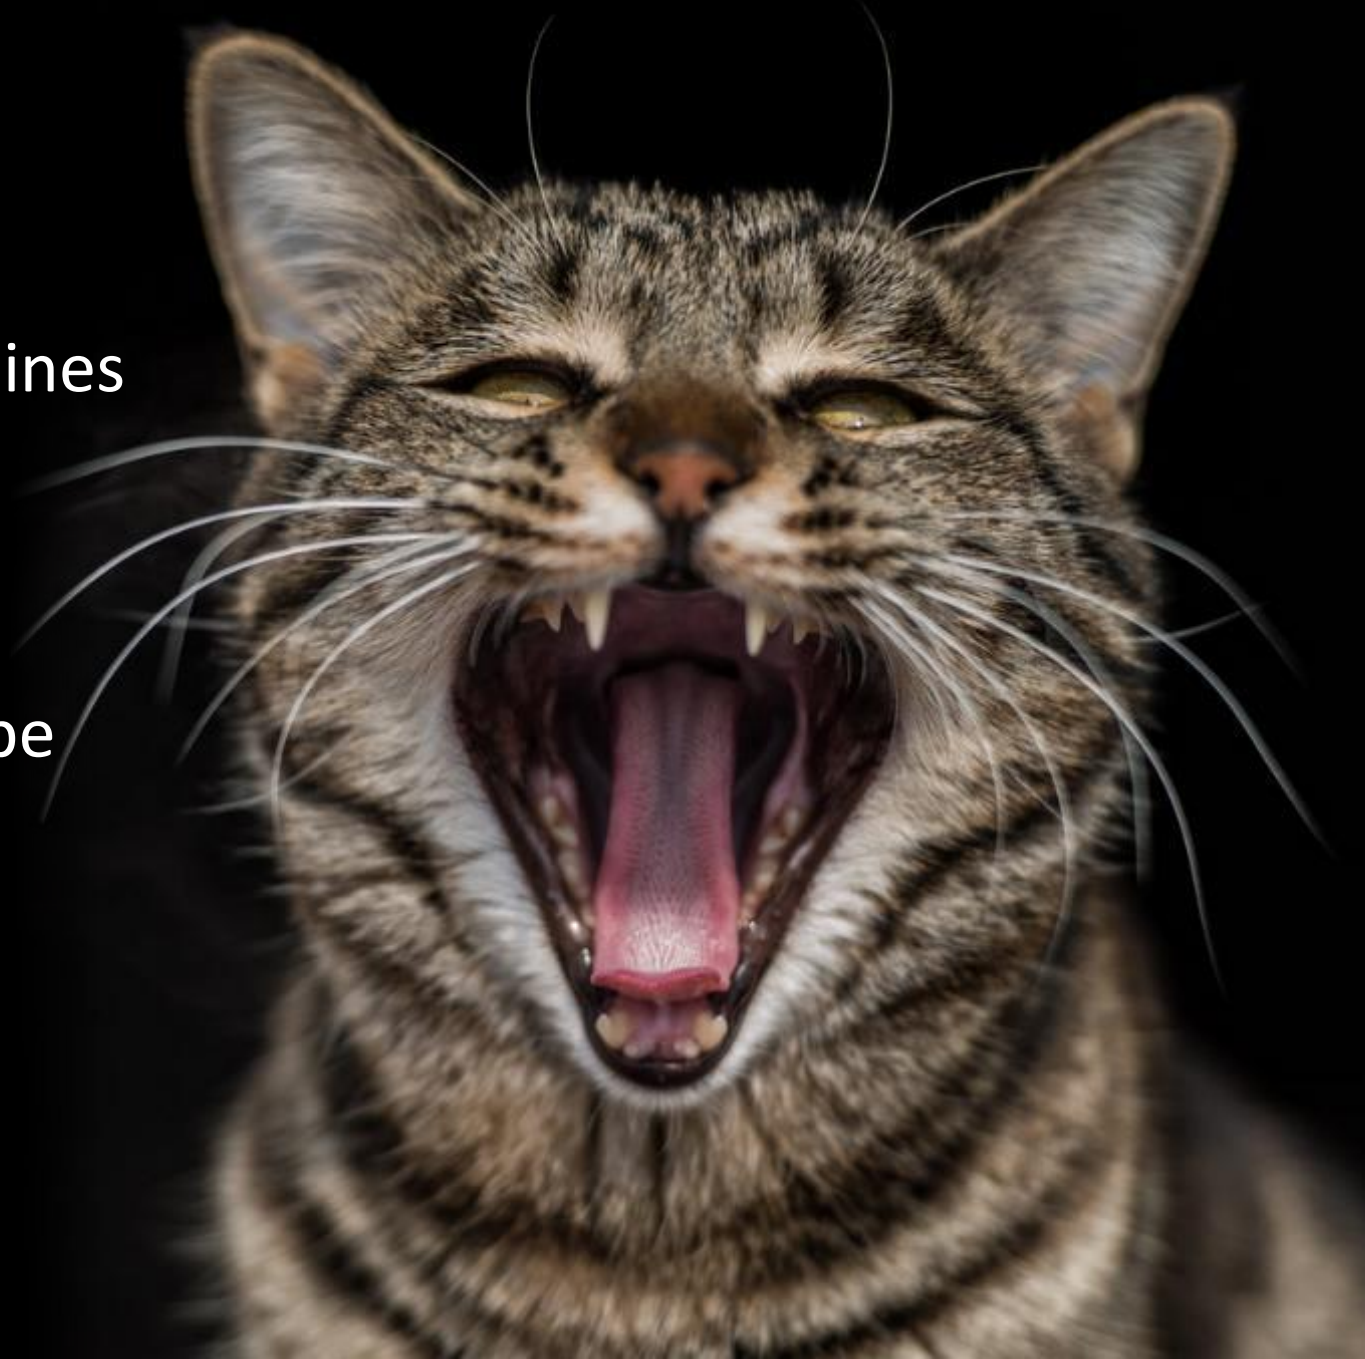

mapping of scientific landscape

...invitations

competitive process

Output

Short policy briefing

Solution ?

Egg-laying-woolly-milk-pig

Silver bullet

Of course not...

But it provides another layer of prevention...

Thank you
