

To: Dr. Ronald Lehman II
Chairman of the Governing Board
International Science and Technology Center

Dear Mr. Lehman II!

15th Anniversary since the establishment of the ISTC, world famous organization, is by right being celebrated by the Kyrgyz Republic Government as one of the bright events of a successful project on collaboration with other countries.

It is not only support of former weapon scientists that is important, but also the opportunity to continue scientific activity for peaceful aims, restructuring national economy towards the market bases and connected with it transfer of social relations towards the democratic principles.

We evaluate our common work with the ISTC during the years passed only positively and we hope that successful cooperation will continue and increase in the future.

Dear Mr. Lehman II, let me in the name of the Kyrgyz Republic Government and myself extend our heartfelt congratulations in your person to all the representatives of participating countries and the ISTC Secretariat on this excellent anniversary and wish everyone new successes in activities for the benefit of cooperation between scientific community of the Republic and the ISTC founder countries.

Please accept my sincere and kind wishes.

First Vice Premier
Kyrgyz Republic Government

Akylbek Zhaparov
